THE MARITIME CIO FORUM ROTTERDAM

29 SEPTEMBER 2015

HILTON ROTTERDAM

The Maritime CIO Forum series of one-day events have been developed to address the issues and trends that technology leaders face in an increasingly changing and continuously developing business environment. CIOs in the maritime sector are expected to deliver strategies capable of both driving revenue and reducing costs for their organisations. Now that their role is taking on a more strategic focus, CIOs need to strengthen their leadership skills while remaining at the forefront of technological breakthroughs and contributing to the business – all the while making smart decisions about maritime technology and satellite communications selection, investment and implementation.

This one-day forum in Rotterdam will address the strategic and practical challenges that all companies are facing at present – such as:

- **Are we approaching a genuine road to recovery 2015-2020?**
- **How is innovation in maritime communications driving the future of shipping?**
- **The Digital Age - maximizing efficiencies with next generation solutions for the maritime market**
- **The future of unmanned vessels**
- **Innovating and investing in the industrial Internet of Things (IoT)**
- **Big data and analytics to drive innovation, competitiveness and growth**
- **Putting information security onto the boardroom agenda**
- **Can the cloud lift global trade?**
- **Future-proofing your IT infrastructure**
- **Disruptive innovation**
- **And more**

Highly targeted, this years Digital Ship Maritime CIO Forum – Rotterdam will consider the future of shipping and how the CIO's role can influence sustainability and competitiveness in a fast paced and ever changing maritime environment. It will provide an opportunity for some of the industry's leading technology experts and business heads to discuss and debate the on-going role of IT and communications in the shipping industry and help to solve the technology, leadership and business challenges ahead.
